9. With reference to the NIS publications listed in 4, above, what are the major shortcomings you have found in the NIS? (Please relate these to your own needs, considering adequacy of coverage, reliability of content, currency, length and detail of presentation, and security classification.) Most NIS material is too detailed and specific for day-to-day use in the Political Section. It also becomes dated very quickly on subjects of current political interest. However, the availability of the NIS is extremely useful when information is needed in a hurry or when one wants a handy introduction to the history and problems of some aspect of French life. Similarly, having the NIS material on other countries, particularly the Soviet Bloc, has been of real help from time to time.

10. What specific suggestions can you make for improving the content (including graphics), coverage, organization, and format of NIS units? No problems here. Coverage, organization and format are well-designed for the purpose of the NIS.
